

JUROL JAMES R. CABALUNA

+63-927-366-2474 | greenmachinedisposer@gmail.com | <https://www.linkedin.com/in/jurol> | <https://jurolc.com/>
Bulacao, Cebu City, Cebu, Philippines 6000

More than 10 years building enterprise software, with Java and Spring Boot at the core of my work. I bring backend depth, React and TypeScript delivery, and hands-on technical leadership to systems that connect people, data, and operations.

Work Experiences

Codev Philippines (Zylon Philippines) - Cebu City, Philippines

Jul 2022 - Present

Senior Java Developer

Software Outsourcing Company

- AIMS/Tellworks Logistics — US-based client | Current assignment
 - Design and deliver features for warehouse and logistics systems using Java, React, and TypeScript, translating business requirements into technical solutions.
 - Investigate and resolve application defects and production incidents to maintain system reliability.
 - Review code, share best practices, and mentor fellow developers.
 - Contribute to architecture decisions covering performance, security, and scalability. Optimize PostgreSQL queries and backend processes.
 - Maintain Azure DevOps CI/CD pipelines and Docker-based development and deployment environments.
 - Collaborate with product managers, QA engineers, and UX designers, and communicate progress and technical decisions to stakeholders.
 - Maintain documentation for features, APIs, and system architecture. Identify opportunities to simplify processes and reduce technical debt.
- Hadean Supercomputing Ltd — UK-based client | Previous assignment
 - Served as the primary backend developer for a software license management system, working with a multinational team across time zones.
 - Designed, developed, and maintained secure REST APIs and a custom identity provider for authentication and authorization.
 - Planned system architecture, API specifications, and database schemas with scalability and performance in mind.
 - Reviewed code and guided junior developers on implementation and best practices.
 - Managed database changes and migrations to preserve data integrity, and created seed scripts and test fixtures to support QA.

NEC Telecom Software Philippines, Inc. - Cebu City, Cebu, Philippines

Feb 2018 - Jul 2022

Software Senior Engineer

Software and Telecommunications

- Delivered nine software projects across the full development lifecycle, from requirements analysis and design through implementation, testing, and support.
- Led a team of one full-time employee and three contractors, coordinating work in an Agile/Scrum environment.
- Developed full-stack applications and reviewed database designs, API specifications, user interface designs, source code, and test specifications.
- Technical skills: Java, JavaScript, TypeScript, HTML, CSS, Ruby; Angular, Express.js, Ruby on Rails; MySQL, MariaDB, MongoDB, Leaflet.js, and mobile backend as a service (mBaaS).
- Tools and platforms: Node.js, PM2, Docker, Apache, Tomcat, Nginx, XAMPP; Git, GitLab, Subversion, Redmine, Box, Microsoft 365; IntelliJ IDEA, WebStorm, RubyMine; Postman, Newman, JUnit, and Mocha. Worked with Windows, CentOS, and Ubuntu.

I Resource (Knowledge Professional Service Cooperative) - Manila, Philippines

Oct 2017 - Feb 2018

Software Engineer

Recruitment Firm

- Completed one software project while assigned to NEC Telecom Software Philippines. Subsequently joined NEC as a direct employee.
- Developed application features using Java, JavaScript, and HTML, with MongoDB, Leaflet.js, and mobile backend as a service (mBaaS).
- Worked with Java Runtime Environment (JRE), Node.js, XAMPP, and Apache on Windows and CentOS.
- Used IntelliJ IDEA, WebStorm, Redmine, GitLab, Git, and Subversion for development and collaboration.

Spingine Corporation - Cebu City, Cebu, Philippines

Jan 2017 - Mar 2017

Junior Software Developer

Software and Internet of Things. Software and Hardware Development.

- Contributed to a flagship fleet and asset management product that collected operational data and displayed it in a web application.

- Developed features using Java, JavaScript, HTML, CSS, and Vaadin 7.
- Worked with MySQL, MariaDB, MongoDB, and Leaflet.js in an environment using Tomcat, Node.js, Ubuntu, and AWS EC2.
- Used IntelliJ IDEA, WebStorm, GitLab, and Git for development and collaboration.

Geckotech Solutions, Inc. - Cebu City, Cebu, Philippines

Feb 2016 - Dec 2016

Software Engineer

Software Development: Enterprise Resource Planning (ERP) Software

- Completed three ERP software projects.
- Worked on-site at Cokaliong Shipping Lines, Inc., providing application maintenance and support.
- Developed and maintained features using JavaScript, HTML, CSS, JSON, and QCGI, an in-house JavaScript-based scripting language.
- Worked with Apache, MySQL/MariaDB, and Slackware Linux, editing code in Vim through an SSH terminal.

Education Level

Cebu Institute of Technology - University - Cebu City, Cebu, Philippines

Bachelor of Computer Engineering, 4.47/5.00

- Department Scholar
- Parangal Awardee
- Working Scholar
- Top Working Student of the Year
- Dean's Lister

Organisational Experience

Knowledge Professional Service Cooperative - Manila, Philippines

Oct 2017 - Feb 2018
